Re: Docket T05-0058 Williamson County IL, Williamson Energy LLC
and Williamson Transportation LLC Petitioners
vs. Illinois Department of Transportation
Petition seeking the establishment of twelve new railroad-
highway grade crossings in Williamson County, IL

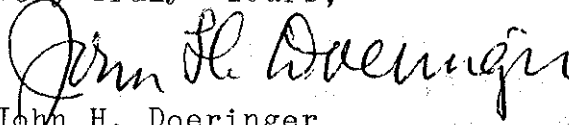

Dear Mr. O'Brien:

A hearing is now scheduled for January 11, 2006 in
Springfield in the above proceeding. The Petitioners have no
additional evidence to offer. Today I spoke by telephone with
Mr. Von De Bur, who stated that the Staff will recommend the
approval of the Petition, as amended, subject to the installation
of automatic flashing lights, gates and bells at all twelve
crossings. Brush and weeds need to be cleared in the area of
the new track for visual purposes. Petitioners concur with
these recommendations.

At the end of the hearing on January 11, 2006, Petitioners
request that you mark the case "Heard and Taken" so that a
proposed order may issue as soon as possible.

Copies of this letter are being sent to all parties on
the most recent list of Parties of Record.

Very Truly Yours,

John H. Doeringer
